**The ITMF Award: Open Systems Publications  
Presents Awards for Outstanding Achievements in IT Management**

On March 22, at the 15<sup>th</sup> IT Management Forum (ITMF 2018), the **ITMF Award** ceremony took place to **mark outstanding achievements in promoting advanced IT Management techniques and best practices**. The Award has been established by Open Systems Publications.

«For 15 years now, all aspects of IT management in global and Russian business alike are highlighted at the event, which since 2012 bears the IT Management Forum (ITMF) name. Throughout this entire period, leading experts and practitioners have been helping us analyze the IT management market, promote achievements of businesses, as well as shape and educate the IT manager community, thus facilitating the growth of our forum,» said Pavel Khristov, Director of IT Focus Area, Open Systems Publications. «Recently, we had another landmark date, the 25<sup>th</sup> anniversary of our publishing house, and to celebrate both of the occasions, we made the decision to mark the contribution of our partners both to the establishment of the Russian IT management industry and to the creation of the ITMF platform.»

*«Beyond any doubt, the forum wouldn't have become the landmark event for IT management professionals if it today had we not been receiving real help from truly enthusiastic people sharing their professionalism, deep knowledge, and rich experience to move the industry ahead,»* said Natalya Dubova, Agenda Leader, ITMF. *„The ITMF Award is the acknowledgment of our sincere gratitude to and respect for the true evangelists of IT management,“* she added.

---

**The IT Management Forum (ITMF)** is a flagship event hosted by Open Systems Publications, focused on a wide range of IT management aspects. The forum is held since 2004, with its current ITMF name given in 2012. An unparalleled platform for sharing experiences and fostering cooperation between business and IT managers, the event has a cross-industry, truly professional audience, including CIOs, technology and business leaders, as well as IT managers of various levels. ITMF has a tradition of inviting globally renowned experts directly involved in the development of international management standards and techniques. Leading players of Russian and global market for IT management systems and solutions partner with ITMF on a regular basis. Up to 500 representatives from Russian and CIS companies of various verticals participate in the forum every year.
